

Data Structures & Algorithms

WEEK 1 – DSA Fundamentals & Arrays

Topics Covered

- Introduction to DSA
- Time & Space Complexity (Big O Notation)
- Arrays & Strings
- Searching (Linear + Binary) and Sorting (Bubble + Selection)

Assignments

1. Write a C++ program for Linear Search.
2. Implement Binary Search on a sorted array.
3. Sort array using Bubble Sort and count swaps.
4. Reverse an array without using extra array.

Mini Project

Student Marks Analyzer

- Input marks of N students in array.
- Sort & print top 3 marks and average score.
